

Hello Friends,

Grace & Peace to you in the wonderful and matchless name above all names, "Jesus"

Our journey back to HHMI Malawi was safe & peaceful. We returned to discover all is well, we're growing here and the children truly have a hope and a future through the work and efforts put forth by the workers and organization that has been established through the hands of God's servants.

Our elementary school is thriving, it was challenging to get all 260 students in the picture. We all enjoyed break time and did some sing along songs together. I asked several of the students to recite the 10 Commandments, and was very pleased with their response.

The garden is springing forth with new life, the bags you see to the right are from our poultry houses, we use the manure in the garden and also generate revenue through sales of it to the local agriculture research center and local farmers.

Our newest addition, pre-school/nursery building is coming along nicely. We're pretty pumped about getting our high school started come Sept.

Pastor Daniel and I went to the Queen Elizabeth hospital yesterday to visit a friend who's awaiting surgery. During our time there I had the honor of ministering and praying for some of the patients.

Thank you once again for your prayers & support. It goes a long way here.
